

Logic Model

The logic model below outlines the anticipated short-term, intermediate and long-term outcomes from the SMART Moves: Substance Use module.

Objective	Short-Term Outcomes (0-3 months)	Intermediate Outcomes (3-6 months)	Long-Term Outcomes (12 months or more)
Youth will build social-emotional and health skills in order to effectively make and communicate their decision not to misuse substances.	Youth report positive views of their future. Youth report confidence in being able to make decisions about substance misuse. Youth report knowing how to say, “No” to peer pressure to substance misuse. Youth report knowing how media and peers influence their attitudes about substance misuse.	Youth access adults and peers as resources to talk about substance misuse. Youth can resist peer pressure to substance misuse. Youth can think critically about online and peer messages to make decisions about substance misuse.	Youth avoid substance misuse.
